

## ABOUT US

Kaizen Cold Formed Steel pvt ltd was established in 2009, with a view to introduce the benefits of high strength and abrasion resistant steel in India. 'Kaizen' means continuous improvement and we believe that together with our customers we can truly realize the meaning of lighter, stronger and more durable steel products.

Steel technology around the world has advanced to a great extent and as a result steel has become stronger, efficient and tougher. Kaizen's focus is to bring to Indian users the benefits of High Strength Steel earlier in time and replace the use of ordinary steel. High strength steel is imported from leading mills of Europe to ensure finest quality parameters. Large inventories are maintained at our Chennai stock yard to ensure 'Just in Time delivery'.

Kaizen has also ventured into component forming for Ready - To - Weld kits of trailers, tippers, load carriers, bulkers, tankers, tip trailers, cement carriers etc. We develop sections like angles, channels, pipes, rectangular sections, square sections, beams and lipped section using different grades of HSS to cater to customer requirements.
